

LONG YEARS AGO

December 4, 1903

Real estate in the south end of town has taken a sudden rise in the last few days.

The new telephone exchange is to be located in Liesemer and Stude's Store.

It is reported that a large seam of coal has been discovered west of Carstairs, and is being worked now.

The snow is about all gone now and wagons are again on the go.

FUNERAL SERVICES FOR MRS. W.G. EVANS AT UNITED CHURCH

Died Suddenly Saturday Morning at Age of 67

Mrs. Edith Helen Evans, 67, wife of Dr. W.G. Evans of Didsbury, passed away at her home Saturday morning, death being due to heart failure.

Born in Bradford, Ont., Mrs. Evans came west 38 years ago and has resided with her husband and family here since 1916, when they moved to Didsbury. She was a member of St. Hilda's Chapter, O.E.S., and of Knox United Church, and has been active in various organizations during her long residence in town.

Surviving are her husband, Dr. W.G. Evans, Didsbury; five sons, Elwood W. and Elmer G., both of Calgary; Howard M. and Fred L., both of Didsbury; and Arthur J. Bowden; two grandchildren; three brothers, Wilfred, Harold and Leonard Wood, all of Bradford, Ont.; four sisters, Mrs. Maude Roberts, and Miss M. Wood, both of Bradford; Miss W. Wood, Newmarket, Ont.; Miss E. Wood, Toronto.

Funeral services were held from Knox United Church, Didsbury, on Tuesday, December 4th, at 2:00 p.m. with Rev. D. Whyte Smith officiating.

NOTES FROM THE WEST

Pte. Roy Walton of Kitchico, recently returned home from overseas, visited with the Campbells last week.

Mr. and Mrs. Manson held a sale at their home last week and will move shortly to the Hartman district. Mr. and Mrs. Manson are old timers in the district and we wish them happiness in their new home.

Mrs. Murdo McArthur of Olds, well-known among W.I. members, is seriously ill with a heart condition.

Miss Karr of Empress, recently discharged from the RCAF (W.D.), is the new teacher at the Elkton school.

Leslie Kenschuh, who broke his leg while tobogganing at Carstairs some weeks ago, had the cast removed last week.

Les Evans, who received his discharge from the U.S.A. army air corps last week, is home to stay.

Mrs. D. Evans entertained at a shower in honor of Mrs. P. Luft on Friday afternoon. Pot holders were made for the bride, who was the recipient of many lovely gifts.

The hostess served a delicious lunch, to close the afternoon.

Mr. Bob Luets Sr., who had the misfortune to break his arm some time ago, recently returned from Edmonton where he has been under a doctor's care.

Mr. and Mrs. Sandy Patterson are helping out at the Melville home, as Mr. and Mrs. E. McNelis and baby have been laid up with the flu.

Mr. Walter Bellamy of Cremona, who has been seriously ill with pneumonia in the Didsbury Municipal Hospital, is improving.

Mr. Ed Parker left Wednesday of last week to visit with his brother at Killam.

Mrs. Haener was moved by ambulance from a Calgary hospital to the Didsbury hospital last week.

After nearly two months with no meetings the Elkton Willing Workers met at the home of Mrs. H. Barnard Wednesday of last week. A quilt was finished up and it was decided to hold a social evening in the Elkton School Friday, December 7th. No charge will be made at the door, but a small charge for articles to sell.

OLDS A.T.A. SUB LOCAL MEETS AT DIDSBURY

The first meeting of the Olds A.T.A. Sub Local was held in Didsbury High School Wednesday, November 28th. The executive is as follows: President, Mr. H. G. Fortues, Olds; Sec.-Treas., Mr. Ed Wiggins, Didsbury; Mr. E. De Bow, Carstairs; Miss Aylce Weiss, Carstairs; Mr. E. McFall, Olds; Miss Mary Parkson, Olds; Mr. J. S. Armstrong, Olds; Mr. John Weir, Sundre; Mrs. A.E. Booker, Didsbury.

Following a discussion, a hockey schedule was arranged.

Mr. Crispo attended as a visitor and gave helpful advice in the matter of the regional and provincial festivals to be held next spring.

Lunch served in the Home Economics room concluded a profitable meeting.

Fellow teachers are urged to support the executive of the sub-local in all its undertakings.

GARAGE BURNS ON NELSON BROS. FARM WEST OF TOWN

Fire of unknown origin destroyed the garage on the farm of Nelson Brothers, west of town, on Saturday, and the building was a complete loss. While the car was not in the garage at the time, the building contained valuable tools and other equipment, as well as some souvenirs which Sherrill recently brought back from Germany.

WESTCOTT W.I. MEETS AT HOME OF MRS. SHEILS

A very enjoyable afternoon was spent at the home of Mrs. C. P. Sheils on November 30th, with a good attendance.

The meeting opened in the usual manner. The roll call proved interesting as each one showed a pot holder as their name was called.

A donation of \$7 is being given to the Wood's Christian Home.

It was decided to have the Christmas Pie as it used to be by each one bringing a gift. In wartime years these collections were given to some worthy cause.

Mrs. W. Owens gave a flower-making demonstration. With little colorful bows in our hair we learned how to make the Christmas flower pinettes.

The draw was won by Mrs. W. Owens. The social item was a piano solo given by Doreen Rennie.

The meeting closed with "God Save the King" and lunch was served.

The next meeting will be held at the home of Mrs. W. Baudistel.

The next meeting will be held at the home of Mrs. W. Baudistel.

MRS. KATHERINE KIEVIT DIES AT AGE OF 67 YEARS

Mrs. Katherine Kievit, 67, died in the Didsbury hospital on Wednesday, November 28th, death being due to heart failure.

Born in Flushing, Holland, she moved with her husband to the Didsbury eight years ago and has resided here since that time.

Her husband, Herbertus, died in Didsbury early in October of this year.

Surviving are three sons, Ary of Lacombe; Sybrend of Delia; Ronald of Didsbury; one daughter, Mrs. J.M. Verkuil of Banff also survives.

Funeral services were held from Knox United Church, Didsbury, on Sunday, December 2nd, at 2 p.m., with the Rev. D. Whyte Smith officiating. Interment followed in the Didsbury cemetery with W. McFarquhar of Didsbury Funeral Home in charge of arrangements.

Funeral services were held from Knox United Church, Didsbury, on Sunday, December 2nd, at 2 p.m., with the Rev. D. Whyte Smith officiating. Interment followed in the Didsbury cemetery with W. McFarquhar of Didsbury Funeral Home in charge of arrangements.

MOUNTAIN VIEW NOTES

The Mountain View W.I. annual meeting was held at the home of Mrs. Art Gibbers with nine members and several visitors present. Two of the visitors joined the Institute for next year.

The members donated five dollars to the skating rink at the Neapolis Cheese Factory.

After the business of the meeting was over the election of officers took place for 1946. These officers are as follows:

President, Mrs. J. Worrall. Vice-President, Mrs. A. Gebers. Sec.-Treas., Mrs. G. Tighe. Directors: Mrs. Mac Wood, Mrs. Everett Blain, Mrs. Joe Fulkerth.

Conveners: Social Welfare: Mrs. Everett Blain. Citizenship: Mrs. Ernest St. Clair. Household Economics and Handicraft: Mrs. Mac Woods. Agriculture and Canadian Industries: Mrs. Basil Atkinson. War Work: Mrs. Ed Blain.

After the election of officers the draw took place for Christmas gifts which were very prettily made from four socks.

The meeting was then adjourned with thanks to the hostess, and the W.I. will meet again at the home of Mrs. Mac Woods in town some time in January.

The Neapolis Skating Club is putting on a big social and program at the Community Hall on Friday, December 7th. Come on girls and bring your boxes. Girls with boxes free.

Potential Tourists Are Now Making Plans For Next Year's Vacation In Canada's Parks

THE number of establishments catering to the tourist trade in the national parks, as elsewhere, was seriously curtailed during war time. Frequently it was not possible to supply all the accommodation required, and it may be some time yet before these tourist facilities will be able to meet the full demand.

But what about holiday travel in the meantime? A great army of potential tourists is now making plans for next year's vacation. The majority of them, after years of stress and strain and self-denial in the interests of the war effort, are not in the mood to postpone that much-talked-about holiday any longer. If there is not sufficient accommodation in the place of their choice, many of them will simply take the necessary accommodations in a hotel, car or trailer. That apparently is what hundreds are planning to do next summer.

In years gone by many visitors to the national parks brought with them their own camping equipment and never had to worry about where they would sleep for the night. Theirs was the choice of a number of camping places easily accessible and scenically located. No need to make reservations in advance; there was plenty of room for all.

With the improvement in hotel and bungalow accommodation which took place before the war, the proportion of those using the public camp grounds fell off, but the trend is now in the opposite direction. In recent years the camps have been greatly improved, many of them being now equipped with electric light, running water, kitchen shelters, tables, camp stoves, fuel, and modern sanitary facilities. Further substantial improvements to these camp grounds are to be made before the next tourist season comes around, so that the national parks can adequately take care of all visitors and provide more comfort for them.

That these camp grounds are popular with national parks visitors is emphasized in a recent letter received from a visitor from Topeka, Kansas. Here is what she says:

"Having completed a short time ago a three-week trip by car, which included a five-day visit to your country through Calgary, Banff, Lake Louise, Jasper, Yoho, Kootenay and Cranbrook, may I express my appreciation for the reception given us and the general air of good feeling between the two countries. I had no trouble in crossing into Canada nor in leaving, and the exchange of currency, which I had dreaded, was no trouble at all. We stayed at the camp grounds provided in the parks, and may I say that they are ideal for that purpose—well situated, clean, and with adequate food provided. The trip was a pleasure and I intend to visit you again."

A holiday to be most beneficial should provide as far as possible a complete change from one's regular environment and customs. A holiday under canvas in the national parks is about as complete a change for the average city-dweller as can be imagined. It is going to be popular too with men and women recently discharged from the Armed Forces who have learned to live out-of-doors, often under more or less primitive conditions.

So, while visitors to the parks wishing to stay at hotels or bungalow camps should make their reservations well in advance, those who are unable to do so, or who prefer to live in the open, should assemble the necessary camping equipment and be ready to go when the open road beckons them next spring or summer. The camper-out need have no misgivings about getting adequate accommodation in the parks. He carries his accommodation with him, and, like the visitor from Kansas, will return home feeling that the trip was a real pleasure.

Atomic Village

It Is Said Will Be Constructed Near Toronto

Britain's top scientific job-director of the Dukes Atomic Energy station at Berkshire will be given to Prof. John Douglas Cockcroft, wartime head of the British nuclear research group, the London Daily Express said.

Cockcroft, a Cambridge University physicist, was said to be in Canada supervising construction of a model atomic village near Toronto.

The Express said he had accepted the post on condition that his work should not be kept strictly secret. He was said to favor secrecy for designs and method of assembling atomic bombs but to believe basic facts of atomic physics should be published to combat scientific stagnation.

CANADIAN STAMINA

Canadian prisoners of war reaching Manila from Japan are in better shape than those of any other nationality. Maj. A. C. Barwick of Montreal said in an interview at Vancouver. He was second in command of the Canadian military rescue team which flew to Manila to direct the return of men to Canada.

MAY FALL ANY TIME — The stately and historic Cologne cathedral is in danger of collapsing. British military government sources announce. Hope persists that it can be reinforced and refurbished. But it is reported off. Sightseers are not allowed inside.

Has Ample Proof

Returned Soldier Thinks Welcome At Halifax Can Be Overdone

Citizens of Halifax, it is reported, are giving a royal welcome to the returning troops. Whenever a transport docks, they assemble in crowds, cheering and bearing gifts. It is a charming custom and one that should help to advertise the virtues of Halifax to the rest of Canada.

But, in the opinion of Sergeant John Doe, it can be overdone. The sergeant had spent four years overseas, going through the blitz and D-Day without a scratch. He was feeling full of joy on a sunny August morning when he stood with thirteen thousand other soldiers on the deck of a transport and gazed down at the cheering Halifaxians.

Then one husky Halifax maiden tried to improve the occasion. With a delivery that would do credit to a big league pitcher she threw a box of candy up to the deck where Sergeant Doe was standing. The sergeant did not see it coming. His beautiful nose was abruptly shattered. So were three of his front teeth. — The Printed Word.

To Fight Malaria

New Drug Is Discovered That Holds Out Much Promise

Discovery of a new drug to combat malaria, which takes 3,000,000 lives annually, was reported to the Liverpool School of Tropical Medicine. Lord Leverhulme, an authority on industrial chemistry, said that tests at the school and in Australia had shown the drug—called paludrine—more effective and less toxic than quinine.

"Paludrine is most remarkable in its protective action against the infection from a mosquito bite," Lord Leverhulme said, "and it may be that suitable dosage will afford complete protection. It is too early yet to assess its value for the prevention of relapses."

He said the drug, discovered by an Imperial Chemical Industries team in 1945, was derived from "a class of compounds hitherto unexplored for this purpose, and that it was easier to manufacture than atabrine."

CHURCHILL'S PAINTINGS

Pictures painted by Winston Churchill have been brought to the United States for reproduction in Life magazine. It was learned at New York. The collection includes several paintings executed during Churchill's recent vacation on the Riviera and in the Italian lake country. Mostly landscapes, they were flown to the United States from London by clipper.

NEW FORM OF FUEL

Pressed wood logs, made from waste which formerly went into the plant's boilers, are being produced by a lumber company in Northern Ontario, and are said to burn better than the original wood from which they have been salvaged. This is the sort of industrial ingenuity that will find new markets.

Human Mind Too Slow

Robots, That Think Fast Are Predicted For Next Year

Robot machines that can "think" and act faster than their men creators figure heavily in the U.S. Navy's plans for the nation's future defense.

"Man's mind will be too slow for combat of the future," the Navy said, "but man's mind can devise the defense."

Promising the vigorous pursuit of peacetime research in naval aviation, a Navy release predicted: "The pilotless aircraft of the future, controlled by electronics, will 'home' electronically on its target. Electronic 'brains' will guide the confemissile with precision. Out of research and development programs will come airborne robots which can initiate defense."

Plans call for experimentation in new types of pilotless aircraft, aircraft of all types, methods of propulsion, fuel, and aerodynamic principles. With improvements in turbojet engines now in sight, and with high speed a prime characteristic of a fighter airplane, future Navy fighters will probably be jet-powered, possibly with rocket assistance for short bursts of extremely high speed, the Navy said.

A Special Method

Montreal Man's Idea For Stretching Shoes Not So Good

Shoe merchants need to have a sense of humor these days. A local shoe merchant reports that a dissatisfied customer arrived in his store with a pair of shoes broken open around the vamp and toe-cap. Upon questioning, the irate customer explained that the shoes were a bit too small and that when he attempted to stretch them the stitches had popped right and left and that they were obviously of poor quality.

The shoe merchant suggested that the fault must be with the shoes, making the irate customer explain that he was in danger of collapsing. British military government sources announce. Hope persists that it can be reinforced and refurbished. But it is reported off. Sightseers are not allowed inside.

"Oh, no," said the customer, "I stretched them myself."

"Well, how did you stretch them?" asked the merchant.

The customer explained that he had put a bean bag in each shoe and had pedaled water on the same. The merchant advised him that he had been a little too original in his method of stretching shoes and that hereafter he would be well advised to take tight shoes to a shoemaker.

LUCKY SERVICE MEN

Thousands of British service men being demobilized are in luck. Because the supply of medium quality civilian suits has given out they are getting clothes of good quality. Scotch tweed which it is said would cost \$140 a suit in London's West End, if such material could be brought, which it cannot. Incidentally, demobilized soldiers have been asked to give their opinion of Army clothing in the first questionnaire ever sent out to all ranks.

NEW N-RAY TUBE

Development of an N-ray tube capable of producing rays of an intensity hundreds of times greater than heretofore attained was announced by Prof. George L. Clark, University of Illinois X-ray expert.

THE WOLF PEACH

Centuries ago the tomato was called the "wolf peach" because it was thought to be poisonous. The so-called "wolf peaches" were thrown to the wolves to destroy them.

TO DODGE BOMBS

Just dig a hole under them, install giant elevators and, he suggests, when an atomic attack occurs, lower the buildings beneath the ground.

Morris Berman, a former engineer with the New York Board of Transportation, is author of the plan. The Empire State Building, the engineer explained, could descend in exactly 38 seconds, dropping at the rate of 1,000 feet a minute.

Unfortunately, it would take a little longer to get it back up again. In fact, Berman explained, it would require five 2,250-horse-power engines about 22 hours to lift the mammoth building to its normal height.

Berman estimated the cost at about \$100,000, one-half the value of the building itself.

PEACE TIME SIGHT

The London Daily Sketch says one of London's most popular peace-time sights has come back to the war-scarred metropolis: the ceremonial changing of the guard at the Horse Guards. A contingent of the Life Guards with a trumpeter on a white horse represented the old guard and the new guard was furnished by the Royal Horse Guards. The ceremony will again be repeated daily.

FOR PEACETIME USE

London's former use in the construction and operation of "Mulberry," the floating harbor used in the invasion of Europe, might be put to peacetime use in Northern Canada mining ventures on remote lakes where mineral deposits were on the shoreline or under water, it was suggested at Toronto by Col. A. C. Street-Webster, one of the men who developed "Operation Mulberry."

ROSS BEESLEY

J. W. Campbell, general editor, Associated Screen News Limited, has announced the appointment of Ross Beesley as western news representative of the company, with headquarters at Vancouver, B.C.

Beesley and his family returned to Vancouver this month after ten years' absence. Formerly he made Vancouver his headquarters in covering the Pacific coast for Fox News; now he will cover stories for four major newsreels with worldwide distribution. During recent years Beesley has paid Vancouver frequent visits of varying lengths, on newsreel or other picture assignments.

It is imperative that a permanent representative be assigned to that district, Mr. Campbell stated.

Ross Beesley can be rated as an "old timer" in the motion picture industry. He made his first newsreel story more than 20 years ago as a young beginner in the game.

Since then he has been in every section of Canada's vast expanse, east and west, north and south, has been on the high seas, and across the Atlantic in Canadian motion picture assignments. In all that time he says his most difficult assignment, technically, was to cover the sinking of a mine shaft in Ontario, 4,200 feet below the surface. He thinks the two stories which will stand out in his mind as the most thrilling were in connection with his coverage of the Royal Tour in 1929, and the Churchill-Roosevelt conference in 1943.

The oldest trip of all was to cover radium mining in the Arctic Northwest Territories; his most hair-raising a flight to northern Quebec with open aboard the freighting plane.

"Wrestling a bull at 3,000 feet," says Beesley understates the experience.

Winnipeg Pianist

Scored A Success In Her New York Debut

Ruth Sobotky, Winnipeg pianist, made her New York debut in Town Hall before what the critics termed "an unusually enthusiastic audience."

The New York Times critic, Paul Bowles, commented on Miss Sobotky's "uncommon ability to hold the listener's attention without indulging in dramatics of any sort... absolute clarity in phrasing... subtlety of nuance... and high degree of musicality."

The young Canadian artist chose for her program the Bach C minor partita, Brahms' variations and fugue on a theme of Handel, a sonatina by Grieg, Arthur Schnitzler's Capriccio and sections from Ravel, Liszt and Shostakovich.

New Guinea was the first south sea island known to Europeans.

Just dig a hole under them, install giant elevators and, he suggests, when an atomic attack occurs, lower the buildings beneath the ground.

Morris Berman, a former engineer with the New York Board of Transportation, is author of the plan. The Empire State Building, the engineer explained, could descend in exactly 38 seconds, dropping at the rate of 1,000 feet a minute.

Unfortunately, it would take a little longer to get it back up again. In fact, Berman explained, it would require five 2,250-horse-power engines about 22 hours to lift the mammoth building to its normal height.

Berman estimated the cost at about \$100,000, one-half the value of the building itself.

A. C. Street-Webster, one of the men who developed "Operation Mulberry."

Col. Dunbabin Of Australia Had Four Stirring Years In The Eastern Mediterranean

ALL good archaeologists are in the army," said Sir Leonard Woolley to do with the Intelligence Service. Col. Thomas James Dunbabin, D.S.O., is Australian (Tasmanian) to be exact) by birth, archaeologist by occupation and is just about to wind up four stirring years in British intelligence in the Eastern Mediterranean.

Difficult Problem

Compensation To Owners In Britain's Post-War Planning

Prime Minister Attlee's Labor Government is going to tackle anew one of Britain's most contentious problems in British post-war planning—compensation to the owners of property requisitioned for reconstruction and slum-clearance schemes.

Winston Churchill's Coalition Administration weathered its most serious inter-party storm last session by making big changes in the compensation clause of its £2,500,000,000 town and country planning bill. Many of Mr. Churchill's Conservative supporters claimed values at March 31, 1929, the yardstick under the act—were too low.

Property values have increased tremendously since the war began. To meet the Conservative objection, a 20-per-cent increase in compensation, over and above the 1929 level, was provided on virtually all types of property.

Labour was dissatisfied with this concession to property owners, arguing that big land-holders stood to benefit. They accepted the bill, however, as a stop in the right direction. Now a Labor government is in power and changes in the bill are in prospect.

Valuable Minerals

Will Prospect For Uranium Deposits In South Africa

South Africa has uranium, the basic composition of the atomic bomb. The deposits have not been exploited but it is possible that prospecting will shortly be undertaken on a wide scale.

In 1919 Dr. William Verdoorn, a government chemist, referred to the existence of radioactive minerals in the Transvaal and Swaziland. Uranium was one of them. Later Dr. A. L. Hall, then assistant director of the Union Geological Survey, announced the existence of "uranium ore" in a mica quarry west of the Selati railway in the northern Transvaal.

Newly discovered in 1929 in the conundrum occurrences of the northern Transvaal, Dr. Hall found uranium ore in the pegmatite formation. In a recently issued report the Union Geological Survey stated that there was an authentic occurrence of pitchblende, the uranium-bearing mineral from which uranium is usually recovered at Garmila, in the northwestern Cape. Small quantities of uranium-bearing elements have been discovered in other parts of the country.

To Dodge Bombs

Inventor Has Idea To Slide New York Skyscrapers Underground

A New York engineer says he's figured out how to save Gotham's towering skyscrapers if, in some future war, atomic bombs began falling on the city.

Just dig a hole under them, install giant elevators and, he suggests, when an atomic attack occurs, lower the buildings beneath the ground.

Morris Berman, a former engineer with the New York Board of Transportation, is author of the plan. The Empire State Building, the engineer explained, could descend in exactly 38 seconds, dropping at the rate of 1,000 feet a minute.

Unfortunately, it would take a little longer to get it back up again. In fact, Berman explained, it would require five 2,250-horse-power engines about 22 hours to lift the mammoth building to its normal height.

Berman estimated the cost at about \$100,000, one-half the value of the building itself.

PEACE TIME SIGHT

The London Daily Sketch says one of London's most popular peace-time sights has come back to the war-scarred metropolis: the ceremonial changing of the guard at the Horse Guards. A contingent of the Life Guards with a trumpeter on a white horse represented the old guard and the new guard was furnished by the Royal Horse Guards. The ceremony will again be repeated daily.

FOR PEACETIME USE

London's former use in the construction and operation of "Mulberry," the floating harbor used in the invasion of Europe, might be put to peacetime use in Northern Canada mining ventures on remote lakes where mineral deposits were on the shoreline or under water, it was suggested at Toronto by Col. A. C. Street-Webster, one of the men who developed "Operation Mulberry."

Born in Tasmania, he is son of Thomas Dunbabin, now Australian press attaché in Ottawa, and Mrs. Dunbabin.

In the course of his archaeological work in the Aegean area, Col. Dunbabin became fluent in modern Greek. He learned to know and to like the people of the remote hill-top villages and the villagers and townspeople of the coast.

Assigned to British Army Intelligence, he was posted to the Near East with headquarters at Cairo. After a while he disappeared for long months.

He grew a fierce, untamed moustache of the type common in Crete. Speaking Greek and living as a Greek, he was one of a little group of British officers who kept the flame of resistance alive in Crete in spite of the attempts of the Germans to add the Creteans in complete subjection.

This group included Colonel Leigh-Pemberton and Captain Moss, who kidnapped the German general in command at Heraklio as he was going from his office to his house, drove him to a suitable spot on the coast in his own motorcar and shipped him off to Egypt as a prisoner, and Major A. M. Rendel, a fellow-student of Colonel Dunbabin at Corpus Christi.

Lieut. Colonel Dunbabin organized and led Cretean guerrilla resistance. He and the others were either landed on the coast by night or dropped by parachute. They slept in mountain caves or in shepherd's huts. They were in and out of Crete towns under the very noses of the Germans and secured the unfailing loyalty and help of the Creteans in the face of savage German threats, offers of reward and brutal reprisals.

When the Australian Red Cross sent supplies after the collapse of the Germans to the Amari Valley, near Mount Ida, which the Creteans call Little Britain, it was found that Creteans there called Col. Dunbabin "The unconquered King of Crete."

Method Is Cheap

Recently Discovered It Converts Wood Waste Into Wallboard

Wood waste in the shape of sawdust, shavings and chips are to be converted into wallboard by a simple quick and cheap method recently discovered. Experiments show that a ton of sawdust will yield 2,000 square feet of board, using equipment so low in cost that most sawmills and wood-working plants will be able to realize dividends from hitherto worthless materials. Present manufacture of hard wallboard involves reducing whole logs to chips before processing, a method requiring a large capital outlay for equipment.

This Week's Needlework

7401

by Alice Brooks

For year-round wear this quilted slipper is an indispensable accessory. Quilt plain fabric or use quilted material in two colors.

The inexpensive to make, smart, comfortable to wear. Pattern 7401 has directions, pattern for small, medium and large size.

To obtain this pattern send twenty cents in coins (stamps not accepted) to House of Arts Department, Winnipeg Newspaper Union, 175 McDermott Avenue E., Winnipeg, Man. Be sure to write plainly your Name, Address and Pattern Number.

The whale shark, largest living fish, has teeth only an eighth of an inch long, which are useless for biting.

EVERYONE MUST CO-OPERATE

The other day we asked an East Didsbury resident if he was going to vote for the water and sewage plan for Didsbury. He said, "If I am going to benefit I will, but if it won't help me, why should I vote on the plan." However, he did say, after the plan had been explained to him, that he certainly wouldn't vote against the scheme.

This man did not understand the plan, nor its possible benefit to him in the future, and some further explanation is probably necessary as a guide to others.

In the first place the water and sewage plan does not call for immediate installations east of the track. Neither does it call for increased tax levy to pay for the initial installation. The present plan is to be paid for by the water and sewage users alone, but the Town and Village Act requires that a two-thirds majority of the ratepayers must be obtained before and money by-law can be carried. That is why the support of the whole town is required to provide Didsbury with water and sewage facilities.

The residents of East Didsbury, and some in the south part of town, will not get water and sewage installations immediately, if the by-laws pass, but in time they can expect an extension of the proposed water and sewage lines, and without increased tax levy. However, if the proposed by-laws do not carry by the two-thirds majority on January 21st, there will be no chance whatever of East Didsbury getting an extension of any proposed system.

Eventually we in Didsbury will want water and sewage east of the track. The only good building lots available in town are in this part of our community, and future home builders are going to build here. When a few more homes are erected in East Didsbury the water and sewage, if installed in the main part of town, would be feasible east of the track on a plan similar to that proposed now.

Anyone who has the interests of Didsbury at heart will vote for water and sewage. Anyone who votes against the plan must be considered as being unfavorable to the idea of having our town advance with others along the line, and if they do not think enough of Didsbury to have it advance with others, why are they living here?

DO YOUR SHOPPING IN DIDSBURY

Local stores now have their Christmas goods out on display and, despite restrictions and quotas, have good stocks of nearly everything that is available for Christmas giving.

People of Didsbury and district would be well advised to do their shopping at home this year—and all the time. The local stores have the same goods as city business concerns and in most instances the prices are as low or lower than their city competitors.

If you make your money in Didsbury and district, you have a patriotic duty to perform in spending it here. In this way we can keep prosperity at home and local businesses, with increased business, can carry better stocks and we will all benefit in the long run.

Make up your mind to do your Christmas shopping, and all your buying in future, at your local business houses. You will always be satisfied with your purchase if you see what you are buying before you pay out hard earned cash.

Canada will have a two-year interim force drawn from all three services, prior to setting up a permanent army, navy and air force. Men enlisting will be signed up until September 31, 1947 and are being recruited on a voluntary basis from men still serving in the forces.

ENGLISH FIRM PRODUCES REVOLUTIONARY WASHING MACHINE

A United Kingdom firm has developed a new "shilling-in-the-hole" washing machine which is simpler to operate than a radio set. It is completely automatic and will wash ten pounds of clothes in forty minutes. The housewife has to do no more than put the clothes in, add soap powder and turn on the switch. The machine fills itself with water, washes the clothes, triple rinses them and damp-dries them. It also empties and cleans itself and shuts itself off. "Launarettes" equipped with ten or twelve machines will soon be opened in many parts of the country, reports the London Daily Mail. They will also be installed in working class blocks of flats.

So far, 9,096 wives and 5,244 children of Canadian servicemen have been brought to Canada. At July 31 there were 23,536 wives and 8,250 children still in the United Kingdom.

REVISED DISTRIBUTION POLICY AIDS VETERANS

War-time distribution controls introduced to ensure a fair share of scarce goods to businesses and consumers alike are gradually being revised to fit the post-war picture. A recent revision in WPB distribution policy provides veterans and new entrants into business with greater freedom of access to goods which have previously been largely distributed to established concerns.

NEW TRANSPARENT COOKER

The first women's electrical exhibition which opened in London recently shows wartime achievements of Britain's women electrical engineers. One item in a wide range of new electrical equipment and devices for homes, schools, health and public services is a new cooker made of transparent plastics which enables the housewife to the progress of her various dishes while they are cooking. Other advantages are super-speed heats, flexible simmer controls and automatic oven regulators.

MOST OF US DON'T KNOW

Hardly anyone—not even the publisher—knows how important a newspaper is to a community.

The smaller the town, the more important the newspaper is in its economic life. Its news, editorials and feature stories focus the interest of surrounding territory on the place in which the paper is published.

This force and the force of advertisements by local merchants build an ever-widening trade area. This means more business, more money for schools, homes and churches—a bigger and better town.

A town with a newspaper is a town with a future. The better the paper, the brighter the future.

It deserves the support of every business man in that town.

We are trying to make this paper worthy of our town. Your help and suggestions are appreciated.

WEDDINGS
PAGE-STEWART

A quiet but pretty wedding was
solemnized at the United Church,
Carstairs, on Wednesday, November
28th at 5 p.m. amid the glow of
candle light and white Mums, when
Evelyn Gertrude Stewart became
the bride of Richard John Phipps.
The bride entered the church on
the arm of her father to the strains
of Lohengrens wedding march,
played by the church organist.
The bride, gowned in a white
satin sheer princess-style dress with
floor-length veil caught up with
orange blossoms, wore a halo of
orange blossoms adorned her head.
Gold slippers completed her ensemble.
She carried a bouquet of
Sweetheart, Roses, and wore a
cameo ring, the gift of the groom;
an amethyst pendant sent to her
from Italy by the groom; and a
very old gold bracelet which was
worn by the groom's grandmother
on her wedding day long years ago
at Sussex, kept up the old tradition
of "something old, something
new, something borrowed, etc."
The bride is the oldest daughter
of Mr. and Mrs. D.A. Stewart of
Carstairs, and the groom the eldest

son of Capt. and Mrs. E. Page of
Didsbury.
The bridesmaids, Miss Olive and
Miss Pearl Stewart, sisters of the
bride, were gowned in very pale
pink sheer floor-length dresses with
gold slippers, a single matching
rose in their hair, and carried bouquets
of pink roses and carnations.
Each wore silver bracelets presented
by the groom.
The groom, wearing army uniform,
was attended by his brother,
who was in air force uniform.
The ushers were Donald Stewart
of Carstairs and John Shultz of
Calgary, each of whom wore but-
tonholes of white carnations.
The bride's mother wore an ensemble
of turquoise blue with matching
accessories and a corsage of pink
carnations.
The groom's mother was gowned
in a cinnamon brown dress, trimmed
with blue, and a spray of pink
carnations completed her ensemble.
Following the ceremony all cars
headed south where a reception
was held in the Empress Hotel,
Calgary. Thirty guests sat down to
a full-course dinner. The bride and
groom cut the three-tiered wedding
cake with a silver knife tied with
white satin ribbon.
The health of the happy couple
was proposed, and singing and
dancing followed in a room tastefully
decorated with white and
multi-colored chrysanthemums and
the lighted tapers looked like a
glow of eventide.
The happy couple departed amid
the good wishes of all present, for
a short honeymoon at Edmonton.
The bride's going away ensemble
was a light grey suit and top coat
of teal blue, with matching accessories.

LAWRENCE-LIESEMER
On Saturday, November 24th the
Prophetic Bible Institute was the
scene of a very pretty wedding
when Pearl Murett, second daughter
of Mr. and Mrs. C. A. Liesemer
of Bingley, Alta., became the
bride of Pte. William Lawrence, of
Bingley.
The bride's younger sister, Doris
Joyce was the bridesmaid and the
bride's older brother, Melvin, was
the best man.
The bride wore pink sheer and
carried a lovely bouquet of dark
pink roses, while the bridesmaid
wore blue sheer and carried a bouquet
of yellow chrysanthemums.
Rev. C. Hutchinson performed
the ceremony.
Friends and relatives attended
the wedding and a buffet luncheon
was served at the home of the
bride's eldest sister, Mrs. Cecil C. C. C.
The happy young couple will
reside at Bingley, Alta., where they
will take up farming.

LETTERS TO THE EDITOR

Editor, Pioneer:

I beg a small space in your paper
to bring before the eyes and minds
of our youth a few thoughts in connection
with the alcoholic habit.
After making application for ration
books for harvest and threshing
help, I was sent a form on which
to report the number of acres of
each kind of work done. No complaint
here, but, do breweries have to
fill out a form showing how
many homes and lives they have
ruined?

Many of us parents have endeavored
to guide our children away
from the evils of alcohol, and it
surely makes our hearts ache to
know that our government authorities
put the poison before our
young men and women in the armed
forces. We all know that alcohol
was the cause of France's downfall
and we must be up and doing if we
are not to be overcome by it too.

It surely must grieve God to see
so much of the grain and fruit with
which he has blessed us, used in
such a way. Perhaps God has been
testing us by sending the unfavorable
harvest weather this fall.

Dr. Harold Moody, chairman of
the British equivalent of America's
W.C.T.U. said: "Englishmen spent
\$12,000,000,000 for drinks during
the war. This money the Britishers
spent for their spot of cheer during
the years of the blitz and buzz
bombs amounted to two thirds of
the pre war national income. I
call upon the government to observe
the duties of its trusteeship by
safeguarding indigenous peoples
from the worst effects of this monster."

Then let us take counsel from
higher authority, namely Paul's letter
to Titus, Chapter 2, verses 1 to
8, and especially verses 2, 3 and 4.
"That the aged men be sober, grave,
temperate, sound in faith, in charity,
in patience. The aged women likewise,
that they be in behaviour
as becometh holiness, not false
accusers, not given to much wine,
teachers of good things: That they
may teach the young women to be
sober, to love their husbands, to be
lovers of children."
If only these teachings were observed
there would be a great many less
drunks and unhappy, broken
homes.

I thank you, Mr. Editor.

MRS. LLOYD HAYNE

BREWING INDUSTRY OF ALBERTA

A SCARCITY OF SEED

(By H. G. L. Strange)

As the season advances it becomes
more and more apparent that
there will be a scarcity of good
seed this year. This refers not only
to Registered and Certified seed
also to Commercial seeds. Farmers,
therefore, who plan on using
any quantity of new seed had better
be quite certain that they can
find it before they haul all their
grain to elevators.

There is one source of quite good
seed available, which is what is
termed "Crop Testing Plan" "A".
This represents stocks in the hands
of certain farmers who had samples
representing their crops grown at

"Crop Testing Plan" tests.
An "A" given by the Crop Testing
Plan means that the seed is
true to variety to a high degree of
excellence. Those who are in need
of this kind of seed might therefore
inquire if in their district there is a
farmer with such stocks in his bins.
As a rule farmers are willing to sell
such good seed to their neighbors
for only a small premium. During
the past fifteen years "Crop Testing
Plan" records reveal that over five
million bushels of such "Crop Testing
Plan" "A" seeds have been
purchased and used with satisfaction
by prairie farmers.

Democracy isn't a scramble where
everyone takes part.

JUST WHAT DIDSBURY NEEDS

NEW STREAMLINED STATION: In contrast
to the familiar frame buildings of the past, this new
station at Hendleton, Ont., stresses modern lines and a
bright interior, is a forerunner of what smaller stations
on the Canadian Pacific Railway may look like when
building restrictions are eased. Three other new C.P.R.
stations in Ontario—at Leaside, Marathon and Whitefish
Falls—are included in the program of experiment to
develop a model as part of an overall improvement
plan.

WE'LL JUST HAVE TO TAKE A SMALLER SLICE

by Collins

WHO DOES YOUR PRINTING ?

All business houses need more or less printed matter,
all of which is within the possibilities of the
local printer. Yet how many are to pass up
the home printer and let the orders go to city
offices which have no interest whatever in rural
communities except to get printing orders and the
cash to pay for them.

Business men, remember that the home paper
is constantly promoting the interests of the home
community and you owe it to yourself and your
local paper to back up these efforts by at least
having your printed matter done locally.

WORLD HAPPENINGS
BRIEFLY TOLD

Development of a prosperous and thriving trade between Canada and India within a year has been predicted.

By means of his own carrier pigeon service, Private C. E. Hickman, stationed in Middlesex, informs his wife when he is coming home on leave.

Men long associated with the late Franklin D. Roosevelt have established a foundation at Washington dedicated to the perpetuation of his ideals.

D. J. Lipson, independent member of Parliament, submitted to the British government a request that Generalissimo Stalin be invited to Britain in the near future.

The R.A.F. evacuated by an air-aided sick and wounded throughout the world last year. Between D-day and VE-day \$2,000 were ferried to the United Kingdom.

Col. Charles M. Rutan, Prices Board administrator of bread and bakery products, said bakery industry controls will not be changed until at least the end of the winter.

The right to march through the streets of Winchester on all ceremonial occasions, said bakery industry, has been granted to the Hampshire Regiment.

The Swiss radio announced the appointment of Dr. Victor Neuf as envoy extraordinary to Canada for Switzerland. Dr. Neuf was formerly attached to the Swiss embassy in New York City.

The problem of finding jobs for women in Canada is not likely to reach a maximum in the post-war period of more than 12,000 to 150,000 placements, Dr. Charlotte Whitton, of Ottawa, said in an address at Toronto.

Hockey In Britain

Will Send Scouts To Canada To Pick Up Players

Major British hockey organizations for the first time will send special representatives to Canada this winter to scout and negotiate for players in preparation for resumption of British league hockey play in 1946-47. It was reported by Harold David of Wembley Stadium.

With few exceptions, pre-war British teams consisted mainly of Canadians who crossed the Atlantic with only an agreement with the Canadian Amateur Hockey Association. But this season, David explained, British representatives will work in close cooperation with the Canadian amateur governing body, signing players only with its permission.

The British Ice Hockey Association is most anxious to co-operate with the Canadian body," he added, "and we hope they will give us all the help they can in providing us with players."

Before the war there was a seven-team league in southern England. Teams were Wembley, Alderley, Wembley Monarchs, Haringey Racers, Haringey Greyhounds, Earls Court Rangers, Streatham, and Brighton Tigers. All are expected to resume a year from now.

Was Very Accurate

Angle Lens Was Among Optical Marvels Of The War

A 90-degree angle lens, no larger than a halved pea, has been disclosed as among the optical marvels of the war.

The lens was used to project three-dimensional pictures from aerial reconnaissance photographs. It enabled photo technicians to determine with an accuracy of five or six feet the depth of a bomb crater or the height of a building.

The lens, developed and manufactured by the Bausch and Lomb Optical Co. of Rochester, N.Y., was mounted in multiple projectors, set up in series, and was capable of reproducing ground elevations with an accuracy better than 1-3,000th of the flight altitude.

Bricks From Rubble

New Process Has Been Invented By German Engineer

Eugen Breck, German engineer, has invented a process for transforming rubble into bricks and building blocks which promises to shorten the clearing of ruins and the rebuilding of German cities.

Breck's process is based on a vibration method and the mobile machines employed makes it easy to haul away debris. Rubble material 10 per cent cement and a small quantity of water are placed in small bins in the machine and current is applied.

The bricks are removed from the casts 24 hours later but a further period of 28 days is required before the chemical process is complete and the bricks are ready for use. Breck's engineering associates said the completed bricks were harder than kiln bricks.

More than 250 pounds of roses are needed to make an ounce of attar of roses.

"BEFORE AND AFTER" DEFEAT—Fallen tiger of Malaya, here's Lt. Gen. Yamashita, "before and after Allied victory." Left, victory smile in 1942 and right, on trial in Manila as witness told of Japanese butchery.

Most Popular Currency

British Sovereign Brings Fabulous Price On France's Black Market

A Canadian correspondent in Paris reports that there is a tremendous black market in foreign currencies. It may be disconcerting to American pride to know that the most sought-after currency is not the mighty dollar but the British gold sovereign. The latter would be worth \$147 at par value, but it brings \$115 in the black market, or 5,000 francs in French money. The reason that such a price is offered for the sovereign is that it is regarded as the safest in which to invest black market profits.

The sovereign was first minted during the reign of Henry VII, and was in common use in the British Isles until the outbreak of the First World War. Up until that time all wage earners were paid weekly in sovereigns and half-sovereigns, except perhaps in Scotland where the banks issued one-pound notes, whereas in England the smallest denomination of "folding money" was the Bank of England 15 note, which was equivalent to approximately \$25. The bulk of retail merchandising after the counters was done in gold and silver.

Men carried their gold coins in a "saccharine tin" carried on the end of their watch chains. When the war came the Government called in all gold coins and they disappeared from circulation almost overnight. The Bank of England then issued one-pound and ten-shilling notes which have been the regular currency ever since.

The gold sovereign must be quite rare even in the British Isles today.

Times was that visitors in almost every country took the precaution to buy currency of the country they were going to spend a holiday or do business in, but British people did not need to do that. They could plunk down a sovereign anywhere and it was accepted with alacrity and without challenge.

The old British pound seems to be still a cut above other coins.—St. Thomas Times-Journal.

Japan's Mistake

Scientists Miscalculated Possibilities Of Making The Atomic Bomb

Japanese scientists tried to learn how to use splitting uranium atoms for making a substitute for coal, after miscalculating the possibilities of making a bomb. Dr. Karl T. Compton, president of the Massachusetts Institute of Technology said. The scientist recently returned from Japan.

The Japanese who headed the atomic bomb project was Nobita, well known to American physicists and himself a competent investigator. He had a cyclotron which was the counterpart of one of the large cyclotrons of the University of California, where these high-energy machines were used to obtain some of the key information on the Allied bomb project. Nobita used his cyclotron in the same way.

His miscalculation was that the neutrons, atomic particles which make and spread the chain reaction that is the atomic explosion, would not spread fast enough to make an efficient bomb an easy mistake to make.

German Machinery

May Be Requisitioned By Britain For Reparations

Arrangements are being made under the Potsdam agreement to bring some German plants and machinery to Britain as reparations. Sir Stafford Cripps, member of the Board of Trade, told Commons.

Cripps said only plants and machinery not essential to German production would be taken. "It is not this question of the defeated enemy people depriving them of their means of livelihood, all together, but of getting all goods and supplies," Laidlaw H. H. Stiles asked. Cripps reiterated that no equipment would be taken that was essential to Germany's peace economy.

It takes six men a day and a half to clean the crystal chandeliers in the East Room at the White House, Washington.

To Maintain Peace

Relationships Between Canada And United States An Example To The World

The history of Canada and the United States exemplifies the relationship which must exist between the nations of the world if the peace is to be preserved. Hon. Paul Martin, Canada's secretary of state, said in an address to the Canadian Women's club in New York.

From the Elysée-Bagat Treaty of 1909 years ago—the world's first disarmament treaty—through the International Joint Commission to the Second Great War's Permanent Joint Board of Defense, Canadian-American relations have been a model of international collaboration for peace.

But Canada has emerged from the Second Great War, not just as an interpreter of the United States to Britain but as a nation in her own right, the state secretary said, pointing to the proposed bill in the House of Commons for a Canadian citizenship act as evidence of the stature of nationhood felt by the Dominion.

Canadian delegate to the 1938 assembly of the League of Nations, Mr. Martin said that if any lesson were learned from the history of the league and the subsequent war which the league failed to halt, it was that power as exemplified by the United Nations must be given its place in the preservation of peace.

NEW CAMERA TUBE

Outdoor television at night or at time, as well as indoors under the poorest of lighting conditions now is possible, engineers of the Radio Corporation of America and the National Broadcasting Company said in New York as they demonstrated a new camera tube that can see at times better than the human eye.

TELLS ITS OWN STORY

It took the R.A.F. two years to win the battle of the Ruhr, and in doing it more lives were lost over Essen than over any other place. Now, when you look down on the deadly stillness of the ruins, you realize that the R.A.F. did not make their sacrifice in vain.

Many of the Burmese people are Buddhists, and their religion occupies a foremost part of their life.

LIFE'S LIKE THAT

WILL-YUM.

"I need some allowance, you need a new winter coat... what do you say we try collective bargaining on pop?"

REG'AR FELLERS—A Nose For Business

Lady With The Lamp

UNRRA Is 20th Century's Idea Of Florence Nightingale

To the liberated nations of the world, UNRRA is a 20th century "lady with the lamp" who dies to the bedside of its patients, using weapons that were undreamed of in Florence Nightingale's day.

UNRRA lost no time when word of a typhoid fever epidemic in Albania was flashed to the outside world in August. Flitting the plane himself, Air Vice-Marshal Richard E. Saul, hero of the R.A.F. and second in command of UNRRA in the area, flew 30,000 doses of vaccine from Italy to Tirane, the Albanian capital.

When a cholera outbreak in China mushroomed to 20,000 cases in Chungking alone, UNRRA flew a "merry band" of seven doctors and two engineers into China over the "hump." One case of vaccine had to be jetted over the Himalayas, but there was enough left to stop the epidemic. Six iron lungs were flown to Prague after a broadcast appeal by UNRRA in England brought 27 offers.

Coping with such emergencies is only one part of the medical work of UNRRA. Dr. W. A. Sawyer, director of the health division, said, "Our three responsibilities are to control epidemics, to help local health authorities get back on their feet, and to provide medical and sanitary supplies where they are needed most urgently," he said. By the end of 1945 UNRRA hopes to deliver 100 tons of supplies where they can do the most good.

"So far we have had no big epidemics comparable to those of the last war, despite Europe's weakened condition, because we have better methods of fighting diseases and can distribute supplies more quickly," Dr. Sawyer said.

But he warned, the crucial test will be the winter ahead, when the resistance of millions to cold and hunger will be at its lowest ebb.

Made Original Models

Woman Worked On Plans For "Mulberry", The Great Harbor

The woman who worked for nearly a year in a specially blacked out room under heavy security regulations, and who made the original cardboard scale models from which "Mulberry," the great prefabricated harbor, eventually grew, is Mrs. Maude Cheslyn Lancaster, personal assistant to Col. V. C. Steer-Webster, B.E., in charge of the Mulberry Mission to Canada. Mrs. Lancaster, whose husband, Major Pat Lancaster of the 2nd Hussars, was a prisoner of war in Java, was chosen after the Quebec Conference of 1943, to work on Mulberry because of her special art training. She was the only woman on the team.

In the actual operation of Mulberry from D-day onwards, Mrs. Lancaster was in charge of the War Office Operations Room. She actually built the relief map of Mulberry now on view with the exhibition on the basis of signals to and from Normandy when her chief was over in France kept Churchill up to date on developments.

Many months later she was allowed to break her secret by showing the models to members of the Lords and Commons. Last spring she visited Paris to explain Mulberry to the women of France, and is now in Canada to do the same job for Canadian women.

By Fred Neher

REG'AR FELLERS—A Nose For Business

THREE PRETTY CO-EDS in three pretty suits, Gloria Collaton, Joy Hardy and Eunice Haviland show you how a CWAC, a WRN and a WD step out of uniform into civvies. It's all as simple as ripping off insignia, adding a dash of hair and a set of buttons. Designed by Martha, Canadian Fashion Creator, these reconverted servicewomen's uniforms retain the good fit and fine tailoring of the original uniform but flash the fashion of the "better" suits. Any discharge can follow these designs herself just by tucking on a little bra and some new buttons.

Becoming Popular

People Are Liking Community Locker Plants For Frozen Foods

Complete "cold centres," serving entire communities or towns and offering services ranging from the storage of furs and blankets to the processing and storage of frozen foods, now are envisioned by leaders in the mechanical refrigeration industry. Their forecast is based on two factors. The first is the steady growth in popularity throughout the country of frozen food locker plants, now numbering more than 4,500.

Second is the increase in the essential services performed by mechanical refrigeration, now past the 200-mark. To these is added the fact that improvements in refrigeration equipment, many of them stemming from war needs, make possible more efficient centralization of facilities.—Brandon Sun.

Arctic Maneuvers

Planes And Vehicles Will Be Given A Severe Test

It will be chilly going for the Canadian troops who take part in the maneuvers in the Arctic region this winter. Planes and vehicles will be given severe tests. How they stand up under the extreme cold will contribute to the general research.

The Americans will be interested in these Arctic maneuvers. The military leaders in the United States want to be prepared to defend their country from all directions. They have no desire to be caught off base by a huge army descending from the region of the North Pole.—W. L. Clark in Windsor Star.

More than 60 per cent of Egypt's handweavers derive their entire living from an acre or less of land.

BAD POSTURE CAN UNDERMINE HEALTH

Poor posture is ugly, fatiguing and damaging to the health, Dr. Jerome S. Peterson of the New York City Department of Health, says in an article in a recent issue of *Hygeia*, the health magazine of the American Medical Association.

"Poor posture is a depressed, mental attitude and bad posture seem to go together," Dr. Peterson says. "Bad posture will throw the body out of alignment and may do serious damage to the internal organs as a result of unnatural compression."

The writer's formula for improving the posture is:

"Stand correctly; stand as tall as possible with rising on your toes. Get your feet a few inches apart and point your toes forward. Hold your head up, bring your chin in. Your chest should be up. The lower abdomen should be in and flat, but don't strain yourself and don't become stiff. Let your hands hang loosely at your sides. Be conscious of your posture, but try to be relaxed at the same time."

Started Years Ago

King George Turned Small Wheel Which Completed Water Scheme

The King completed a great water scheme begun in 1899, when he was only three years old, by turning a small wheel and opening the outlet valves of the Ladyship reservoir in the Dorsetshire hills.

At the head of Howden reservoir the King played an oak tree. He kept up a running commentary of jokes as he shovelled earth round the tree.

"At any rate, this shows I can still bend," he said, and added as the crowd cheered and applauded when he had finished: "I hope that tree will grow."

The reservoir will supply water to Sheffield, Nottingham, Leicester and Derby areas.—London Daily Sketch.

A STINGLESS BEE

From Sydney, Australia, came word recently of development of a stingless bee, ending 15 years' search. It all started, said the Australian News and Information Bureau, when backyard beekeepers in Sydney were annoyed with late neighbors complaining about their bee swarms. H. Graham Smith of Hawkesbury, New South Wales, Agricultural College, was said to produce a bee that wouldn't sting.

Chinese is spoken by 488,573,000 persons in the measured language. English is spoken by 247,832,000.

OUR COMPLETE SHORT STORY—

HERRICK SAID IT

By GWEN CASH

Copyright
Wheeler Newspaper Syndicate

"This sailor ran into me as I came out of the apartment hotel, where I live in one room with a turn-about bed, kitchenette and bath. Almost literally ran into me, I mean. Hanging onto his arm was a drowsy-looking fluff of a girl, dressed in white with skirts a bit above her bare knees and the sort of hat a woman my age can't get away with but would like to, perched on a couple of curls. It was a Saturday morning in July. A morning that fairly quivered with sunshine. As I'd passed the florist shop in the hotel lobby, I'd smelt roses, sweet peas, mignonette and remembered, though it seemed years ago, I'd once lived in a house with a garden. Had once had a real home—not just a turn-about bed. It was that sort of morning—nostalgic but full of promise at the same time.

The sailor grabbed me by the arm. "Can you give me the name of a really reliable parson?"

I smothered a laugh. His young, blue eyes were far too serious. "Baptist, Methodist, United, Episcopal or Catholic."

"It doesn't matter a bit just as long as it's tight and legal—and in a church, Sonia here," he looked down protectively, "is Russian by descent."

"How about your papers? License and things?"

"All in order," he said.

"When's it to be?"

SLOAN'S LINIMENT

GIVES FASTER RELIEF FROM STRAINS, STRAINS, ACHES AND SORROWNESS.

Easy Breathing

Mentholatum quickly relieves stuffy nostrils, clears head, helps you breathe freely. Mentholatum gives COMFORT daily.

ITCH CHECKED

For quick relief from itching caused by eczema, athlete's foot, sunburn, poison ivy and other itchy conditions, use Mentholatum. Mentholatum gives COMFORT daily.

"Today—please, I'm ashore till Monday. I've enough to—" then he looked embarrassed and changed what he'd begun to say into: "We'll get a hotel room tonight." I guessed he'd been going to say he had enough money for the week-end honeymoon but suddenly remembered I was a stranger. I guessed too, some Monday his Sonia would be looking for a job.

I took them across the road to Neptune House, a sailor's canteen, where my war work was to hostess and generally make myself useful. We phoned here and there, but the entire city seemed bound to be either buried or wed on that particular Saturday. At last the ceremony was fixed for seven o'clock that evening at St. Stephen's, Episcopalian.

Then this sailor said, "Would you know anyone who'd be my best man?"

"Of course I might have dug up some odd dodo or other. But I figured if this boy had been married in peacetime, a school chum would have stood by him, so the least and best I could do was to get someone about his own age."

I cornered Jack over the phone. A freckle-faced, good-natured boy about eighteen. "O.K. lady," he agreed resignedly. When I explained what we wanted.

All this time the girl Sonia had said hardly a word. Now she looked at me with dark eyes and asked, "Is there any place I could put on my stockings before my wedding?"

This, then, was to be the limit of her preparation for her wedding! To pull over her slender sun-tanned legs a pair of wartime stockings!

I offered my apartment. Suggested she might like to rest there that afternoon. But she shook her head. She'd be exploring the town with her sailor.

We met there that evening. I told the sailor and his Sonia and Jack and the wedding friend when I'd had to phone to explain why we couldn't dine together as we'd planned.

Back at the apartment I drank to their happiness in the not very good sherry I'd managed to dig up. Then this sailor and his Sonia, looking like stary-eyed children, wandered out into the still and lovely summer night.

As the door closed after them, I caught sight of myself in the mirror opposite. Could my hair be as grey as all that? I'd not realized the terrifying network wrinkles had made about eyes that had once been called beautiful! No amount of lipstick could make that mouth desirable. Even the figure I'd always considered lissome looked nighty to-night.

I thought of another night in a July and a war a quarter century back. I was then a girl, not a sailor's wife, and the sailor had kissed beneath the summer stars; a sailor with gold on his uniform, but as young and handsome, with eyes as blue as those of the boy on whom the door had just closed.

Only for me there had been no last wedding evening with strangers in a little corner church.

Instead there had been a family with wealth and a real sense of the fitness of things. A family with "your best interest at heart, my dear."

"Now, Sonia, you know it's impossible for Mommy to desire to do a wedding gown at such short notice." (Sonia had pulled on a pair of stockings and called it a day.)

The man may be a fortune hunter, my dear. We know nothing of his people. Suppose, just suppose there should be consequences, if you married him? (Sonia's parents had lost their daughter when she'd left on her three-day uncomfortable journey by bus and train to join the man they had never seen. And I didn't doubt they'd welcome a grandchild.)

"The relations haven't met him." "Our friends don't know him." "If you're so deeply in love you'll be willing to wait till the next time he's in port and we can have a proper wedding."

But his next port was on an uncharted shore, so there was no "proper wedding."

"Gather ye rose buds while ye may." Old Time is still flying.

Herrick said it two hundred and more years ago. Dorothy Dix couldn't give better advice.

Roscoe memories of a week-end honeymoon would be mighty precious treasure to a lonely woman with growing hair who lives in one room with a turn-about bed.

WE'RE POINTING STRAIGHT AT YOU IF YOU WANT FAST RELIEF FROM A Cough-Cold

● How's what to do. Get a bottle of BUCKLEY'S Mixture. Take a few drops. Feel its instant effective action spread through throat, head and bronchial tubes. It starts at once to loosen up thick, choking phlegm, ease the cough, soothe the raw irritated membranes of throat and upper bronchial tract. Don't take chances—take BUCKLEY'S, Canada's longest selling cough and cold remedy. It's different—it's all medication—no syrup—acts faster—goes farther.

BUCKLEY'S Mixture

Democracy On March

But It Will Take Time To Educate Other Countries

When the great father of free China, Sun Yat-Sen, issued the revolution, he calculated that it would take 40 years to complete. That would mean 1951 or 1952. When the Russian revolution was staged in 1917 Lenin and his associates agreed that the dictatorship for the proletariat would have to be maintained for at least 25 years. Let nobody be fooled. Complete freedom of speech, religion and expression is coming in Russia. It is, I think, a reasonable bet that the peoples of that vast land will win all the free freedoms at least as soon as do all subjects of our own King, or as do the colored people of U.S.A.

Democracy is already on the march. It is a force as irresistible as gravity. For in the end no educated human beings will consent to be ruled either by hereditary tyrants, or by Fascist gangsters or imperialist interlopers, however benevolent. —Elinore Philipps

FOUND NEXT EGG

A total of \$3,000 in government bonds was the "most-egg" the clerk in a local market found recently when she spotted a cure of eggs delivered by a Twin Falls, Idaho, rancher. The owner, Thos. M. Gilbe, was not aware of the loss until he was notified by the owner of the bank to which the bonds were returned by the clerk.

When submarines are operating in peace-time, a submarine warning flag is shown on their tenders, while the sub itself bears on one of its periscopes a small metal flag of the same design.

An average 2,000-horsepower aircraft engine undergoes 55,000 individual inspection inspections during its manufacture. 2047

A COUNTRY EDITOR LOOKS AT OUR CANADA

◆ What's happening around Canada: The victim of a prank at the age of four, when a piece of string was placed in her ear, a Kirkland Lake lady, now 22, had it removed by a doctor after severe pain. A C. Winder's barber shop last week closed as the oldest business in North Battleford, Sask. The life owner started it in 1908. Little Florence Henegar of Dawsonville, N.B., gathered a pullet's egg which has a clock dial design on its surface, exact in all detail. There was excitement and windows in the area had to be closed when a slunk found refuge under the grating on the sidewalk of the Walkwell Shoe Store in Gannanque, Ont.; two soldiers in their cups tried to dislodge it; as the crowd gathered J. Butler was struck by a car, knocked down, and (run was had all round. Thomas H. Fuller lived in Warwick County, Ont., in the 80's year, lived his entire life on the farm he was born. Johnny McClellan, three years, was fatally injured by a freight engine at Wayne, Alta. When he rushed on the tracks to save his puppy, which had wandered onto the right-of-way.

◆ 99 out still going strong: Both Mrs. Margaret McLean of North Kamloops, B.C., and Mrs. Salina Ives Henry of Altamont, Farm, near Grimsby, Que., celebrated 99th birthdays, second last week in October.

◆ It is wealth or doggone good citizenship: Tax payments for the city of Kelowna, B.C., reached the record of 97,955 as against last year's ordinary percentage of 97,891.

◆ A plug for women from the front: The National Council of Women, which has been active in the war has brought to pass there can be no doubt of the increased fields which have opened up for women. Women have always shouldered their responsibilities in wartime, but never have they assumed responsibilities so great as in recent years.

◆ For the most noble sacrifice of all for the National Clothing Collection recently a banquet to Lums club of Sarnia, Ont., who at a luncheon devoted themselves of all their clothing except of course underwear and socks, and donated them for destitute Europeans. The Sarnia Reformers had a big picture of the courageous, if chilly, gentlemen, to prove that Sarnians go one better than any other set of folk.

◆ Each blind person in Amherstburg, Ont., will be presented with a Wander Wheel, the new guide, by a former resident, Harry J. Deneau, now of Monterey Park, Calif. The Rotary club was asked to make this gift for distribution purposes. Said Mr. Deneau on a visit: "I am doing this for my mother to show her that her son has some thought for his old home town."

◆ She proud, Mrs. Jack Lawrence of Red Deer, Alta., has word that her brother, Capt. Boris Zolotarev of Moscow has been decorated with the Order of the Hero of the Soviet Union, highest decoration that country would bestow four times, he has six decorations. All four brothers served with the Russian army, as well as her sister.

Being Put To Work

Japanese Soldiers Kept Busy Cleaning Streets In Canton

The Chinese are in charge of Canton, where old Cithay first experienced contact with western civilization. They have not asked for help and they don't tolerate interference. There still are Japanese soldiers in the streets of Canton and they wear little white gauze masks. They need the masks because they're sweeping the streets.

An American soldier said he stood on a street corner with an aged Chinese who spoke excellent English, watching two Japanese assassins creep from a building, leaving a passing unit of Chinese cavalry.

The sergeant inquired if the sight pleased the old man. The answer, said, "I liked and then answered: 'However, it is written that in the time of the great emperor Han Wu Di the Chinese soldiers were mounted upon elephants.'

Five species of surgeons are found in Canadian waters.

PORTRAIT OF A POPULAR "IN-LAW"

MOTHER BARNES is her son-in-law's favorite relative. Mind you, there was a time when Mother's visits sent him scurrying for cover. But that was before her doctor told her that coffee in tea and coffee making her irritable—and suggested Postum instead.

Mother loves Postum. It's so full-flavored and heartening—not like tea, not like coffee, just downright delicious in its own right. And Postum contains no caffeine—no other drug that might affect heart or nerves or digestion.

Postum is made instantly, right in the cup, just by adding hot milk or boiling water. Costs less than a cent a serving. Try Postum today!

A Product of General Foods

Hiding In England

1500 Deserters From Armed Services In Danger Of Arrest

The London Sunday Express said that more than 15,000 deserters and deserters from the armed services, including 240 Canadians, are hiding in Britain "in constant fear of arrest."

The article said remarkably few men have been "sifted away." They were reported to be spread widely through Britain, some in small villages. Provost reports show that most of the absentees are sheltered by women.

Authorities are asking how it is possible that such large numbers are able to escape arrest without identity cards, ration books or clothing coupons. Military police have been ordered to round up absentees, many of whom are said to be hiding down civilian jobs.

AT THE CROSSROADS

Europe stands at the crossroads of hope and despair and the only hope of the European people is faith in Britain, Canada and the United States. Gen. S. M. Money of Montreal, UNRRA's executive officer for Europe, said.

INDIAN TROOPS

It can now also be disclosed that 20,000 Indian troops were overseas at the end of the European war. They were in Italy, Africa, Iraq and Iran where they guarded the supply route to Russia.

ON A SHARP, COLD DAY

Warm yourself with big, generous helpings of a steamed pudding. So simple to make, so satisfying to eat. If you haven't a quart mold, use a 1-pound coffee can or baking powder tin and cover with waxed paper held in place by rubber bands. For a first try, Steamed Fruit Pudding or Steamed Carrot-Bean Pudding will reward your efforts.

Steamed Fruit Pudding

2 tablespoons butter or margarine
2 tablespoons sugar
1 egg, well-beaten
1/2 cup molasses
1 1/2 cups sifted flour
1 cup raisins
1 cup currants

Blend butter and sugar thoroughly, add egg and beat well. Stir in molasses. Stir flour with soda and salt; mix with All-Bran. Add to first mixture alternately with boiling water. Stir in raisins and currants. Pour batter into greased 1-quart mold; cover tightly and steam about 1 1/2 hours. Serve with hard sauce or other pudding sauce. Yield: 8 servings.

Steamed Carrot-Bean Pudding

2 eggs
1 cup sugar
1 cup grated raw carrots
1 cup milk
2 tablespoons melted shortening
1 cup All-Bran
1 cup fine dry bread crumbs
Beat eggs until light; add sugar and beat until fluffy. Add carrots, milk, shortening, and carrots. Add raisins, citron and orange peel. Mix well. Fill greased 1-quart mold or 1-pound coffee can three-fourths full; cover tightly and steam about three hours. Serve hot with hard sauce or any desired pudding sauce. Yield: 8 servings. Note: Pudding may be steamed in greased custard cups for about one hour.

further notice.

Raymond Neufeld underwent a
successful appendix operation in
the Didsbury hospital Monday.

Mr. J. D. Thomas of Airdrie dis-
trict was a Didsbury visitor Tues-
day.

J.A. Booker, who is with the for-
estry division at Lac La Biche, ar-
rived in Didsbury last week and
has been visiting with his parents,
Mr. and Mrs. H.D. Booser.

Cpl. Ted Wall visited his mother,
Mrs. W. McCulloch, on his way to
Calgary, where he expects to get
his discharge.

Mr. and Mrs. Munro and family
of Calgary visited Sunday at the
home of Mr. and Mrs. E. Wiggins.

—The Builders' have a few Briggs
and Stratton Pump Engines.

Mrs. Bill Ranton was an Olds vi-
sitor Monday and Tuesday.

—The Neapolis Skating and Curl-
ing Club Box Social will be held in
East Community Hall on Friday,
December 7th. Program to follow.
Ladies come and bring your boxes.

Capt. and Mrs. J.G. Walker and
family of Calgary are visiting this
week with the latter's parents, Dr.
and Mrs. J.L. Clarke. Capt. Clarke
will shortly open up a dental office
in Calgary.

Mrs. D.W. Iverach and Davie of
Edmonton were visitors last week
with the former's parents, Mr. and
Mrs. E.G. Ranton.

Mrs. E.G. Ranton was a business vi-
sitor to Calgary Tuesday and Wed-
nesday of this week.

Mr. and Mrs. Lewis McCulloch
visited in Didsbury last week with
Mr. and Mrs. H. Viney Lewis, son
of Mr. W. McCulloch of Didsbury.
is a drilling contractor at Vermil-
ion.

The December meeting of the W.
C.T.U. will be held at the Mount-
ain View Bible School on Thurs-
day, December 13th, at 8 p.m. There
will be a Christmas program with
special music provided by the Bible
School students. All interested
friends are invited to be present.

Miss Ruth Finlay received a let-
ter this week from her mother,
Mrs. F. Finlay, who is on her way
to Africa to do missionary work.
Mrs. Finlay boarded a plane Tues-
day at New York and will fly to
Liberia, and then on to Nigeria,
where she will go the rest of the
way by boat.

Mr. and Mrs. F.W. Leeson and
Carlton were Calgary visitors the
first of the week. Mr. Leeson is at
present in the Holy Cross hospital.

The roads leading east from town
to the highway have been in a very
slippery condition the past week
and numerous cars and trucks have
been going into the ditch. These
roads should be sanded to prevent
any serious accident.

NOTICE TO CREDITORS AND CLAIMANTS

In the Estate of AMANDA
THOMAN, late of Didsbury,
Alberta. Housewife, Deceased.

Notice is hereby given that all
persons having claims upon the
Estate of the above named AMAN-
DA THOMAN who died on the 14th
May, 1936 are required to file with
the undersigned by 29th December,
1945 a full statement duly certified
of their claims and of any security
held by them, and that after that
date the Administrator will distrib-
ute the assets of the Deceased
among the parties entitled thereto
having regard only to the claims
so filed or which have been brought
to his knowledge.

Dated at The Court House, Cal-
gary, Alberta, 20th November 1945.

D. L. SLOAN,
Public Administrator for the
Judicial District of Calgary.

WANTED—50 pair of Boys' Girls
and Ladies' Skates. Builders'
Hardware Store, Didsbury.

—The Springside Junior Red Cross
will present a short play on Friday,
December 7, starting at 9 p.m.
Lunch free. Dance will follow. Pro-
ceeds for Springside Christmas
concert.

The annual meeting of the Senior
W.A. of Knox United Church will
be held at the home of Mrs. Nor-
man Clarke on Friday, December
7th, at 2:30 p.m.

Mrs. E. G. Ranton was the win-
ner of the \$25 prize in the Harmony
House Programme, Vancouver, on
Monday night.

Mrs. E. Pearson returned home
last Wednesday after visiting for
the past five months in California.

Chris Flanagan has been laid up
with the flu this week and pupils
in grades 7 and 8 have been en-
joying a holiday from classes.

Mr. and Mrs. Mack Hearst and
two daughters of Calgary spent
the week end with Mrs. Pearson.

A Farmers Union meeting will be
held at the Harvey Hosegood home
on Wednesday evening, December
12th.

Come to the Jutland school on
Friday, December 7th, at 8 p.m., to
the musical program of Jutland
Christian League. Phillip Paulsen,
eleven-year-old lad who has just re-
turned from China after three and a
half years in a Japanese concen-
tration camp, will be present. Pic-
tures from China and India will
be shown by the boy's father.

—In the Cassidy Lumber Yard ad-
vertisement last week, speaking of
some of the men who work with us
having invested enough money to
build the new building, the word-
ing suggested Mr. Burgess and Mr.
Lusk hadn't given good service in
the past. We didn't intend this, as
they have given very good service.
—Cassidy Lumber Yard.

—The Central Alberta Dairy Pool
at Olds will buy Turkey's this year
at Calgary prices, and producers
can pool their birds and receive
any additional benefit from sales
made by the Pool.

Miss Joyce Morgan is back on
the job at the local post office after
releiving at Carstairs post office for
a few days last week.

Mrs. Lynch-Staunton, who was
quite ill with influenza, is again
back on the teaching staff of the
public school.

heller visited in Didsbury over
the week end with Mr. and Mrs. E.J.
Rouleau and family.

—For Expert Radio Repairs consult
the Builders' Hardware.

We missed our notes from the
East this week. This is the first time
that our correspondent, Mrs. Marie
Coates, has failed to have her news
in since the first of the year, which
is a record to be proud of.

EVANGELICAL CHURCH NOTES

"Tests of a Christian" will be the
theme on Sunday, December 9th at
10:30 a.m. Sunday school will be
held at 11:30 a.m. There will be no
evening service. Sunday school
and service at Bethel will be at 2 and 3
p.m.

The Christian Service Guild will
present a musical program at Ju-
tland school on Friday, Decem-
ber 7th at 8 p.m. Paulsen of Three
Hills will show pictures from China
and India. His eleven-year-old son
will tell of his experiences in a
Japanese concentration camp. We
invite all to attend these services.

CARD OF THANKS

We wish to thank our many
friends and neighbors for the kind
expressions of sympathy and beau-
tiful floral tributes sent at the time
of the death of a loving wife and
mother.
